CALL 911 ONLY

ARMED and READY

13 V

Android / iPhone

This is a personal protection system application that allows user to send out notifications to their trusted ones in case of an emergency. A user's location is continuously monitored via the onboard GPS and an alert message is pushed to the selected contacts via SMS, email, Facebook post, twitter post. The alert messages are pushed from the server, complete with the location coordinates on a Google Map, which means that if a user goes missing then he/she can be tracked and an alert message will be pushed even without a Data network when the timer expires.

Medical App

Android / iPhone / Blackberry

This application allows user to access medical articles on their phones. Users can search through a list of over 1000 plus medical articles, browse or mark as favorite. As the articles are updated on the server, the app notifies the users about the same. The articles are available for paid subscriptions.

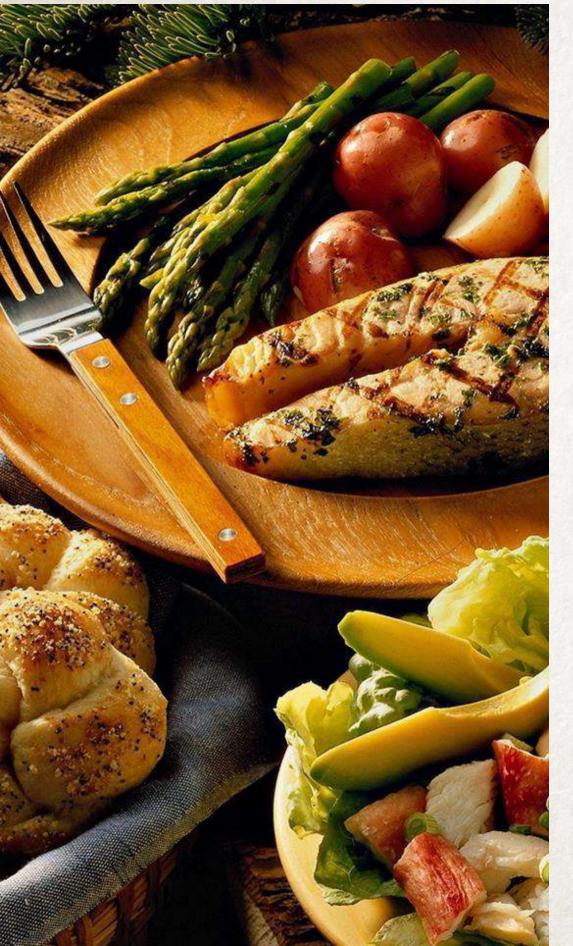

14 2 4:00 YARD BALL 0

Yard Ball

Android / iPhone

This is a game wherein user can play the game against the phone, player vs player, or in team from 2 to 4 players each. With the 'swipe' interface user loved in the most popular games, the fun is maximized with an authentic simulation which allows for responsive and accurate results. Easy to play but hard to master, the game allows user to use multiple strategies to win the game. Go for accuracy or knock your opponents' ball out of the court, even restart a round by bouncing the little white ball out of the court.

Local Dining

Android/iPhone

The Yale Dining Fast Track App provides the campus community features like Residential Dining Hall occupancy – estimated current seats in use based on transactional data, Dining menus for Today and Tomorrow, Map to all Residential and Retail locations, Dining Hall contact information, Ability to provide real time feedback regarding food and service in a specific Dining Hall, Menu item nutrition information, A link to purchase of Eli Bucks – a pre-pay dining plan that eliminates the need to carry cash, A link for 2Go Orders - a sack lunch or a late plate to eat in or take out.

Insurance iKit

Android / iPhone

The Insurance app gives you access to your insurance information, will help get you an Insurance Quote and if you are ever in an accident, collect the information you need and help get you back on the road. No one wants to deal with an auto accident, but the app reduces the hassle of filing a claim. When you have an accident you need to make sure you get all the information you need to file a claim properly. The Accident Toolkit will walk you through gathering all the information needed to file a claim. You only have to enter your policy information one time. The app will allow you to take photos of the damage, note the location on a map, and then send the insurance claim information onto your agent. You can even call the police or a tow truck right from the application.

iPhone

Virtual Menu

iPad / iPhone / Android

This app serves as a virtual waiter in bars and restaurants. The application will assist in the ordering process, thereby reducing the need for a waiter, as well as help keep a record of the past purchases of the customer in order to facilitate a client in the ordering process. This application will help in restaurants improving their service qualities by getting a better analytics of their customer demand patterns as well as help improving productivity by bettering the KOT (kitchen order tickets) system. The system will be built keeping a multi-location deployment in mind. This app will help you to order your food by login trough with your username and password. This will also help you to pay your bill by cash or credit card.
